Our services

Hello!

Nice to meet you

We are a Mexican company dedicated to providing education, and training services for aeronautical technical personnel.

We are convinced that the success of organizations is based on providing technical and human tools to their collaborators. With this, the collaborators will be the differential of the company with the customers.

History

SALTILLO AIRCRAFT MAINTENANCE S.A DE C.V. is born of the need of the national and international airlines, to obtain specialized services of aircraft maintenance, that meet their needs of **QUALITY**, **TIME** of delivery, **COSTS** and **SAFETY**.

History

SALTILLO AIRCRAFT MAINTENANCE S.A DE C.V. is legally constituted, on **August 8, 2008**, in full compliance with commercial laws and permits required for its operation, it obtains the certificate of **Taller Aeronáutico number 246**.

There are technical staff with more than 20 years of experience, with DGAC, TC and FAA certifications.

History

SALTILLO AIRCRAFT MAINTENANCE S.A DE C.V. as part of the expansion process, decides to obtain a certificate to operate as a training center to meet the needs of the internal client and to extend it to external clients.

Having met all regulatory requirements, the operation and performance certificate **no. 156** as a training center was awarded.

Training center has instructional staff with over **20 years** of experience.

Our headquarters

Our facilities are located in Mexico City. We can teach any course in the city that the customer determines or we have available a LMS platform to do it online.

“MISSION, VISION & OBJECTIVE”

MISSION

Training of aviation technicians as required by the national and international aeronautical industry, as well as; training through the provision of initial courses, recurrent and/or periodic and all of the different flight equipment used by customers. Contribute to the national aeronautical sector and even meet international requirements, through educational processes focused on loyal competencies, based on science and aeronautical technology and strictly adhered to the current legislation.

“MISSION, VISION & OBJECTIVE”

VISION

Consolidate itself as a Technical Training Centre of academic and technical excellence in the field of civil aviation, positioning itself as a leading institution, both in the country and abroad, through development, research and permanent incorporation of innovations, methodologies, improvement of education and research processes in aeronautics.

“MISSION, VISION & OBJECTIVE”

O B J E C T I V E

*Provide to the staff of Saltillo Aircraft Maintenance S.A. de C.V. as well as our customers; training and technical-professional culture that allows them to refine, increase and reaffirm their knowledge, skills, attitudes and responsibility, which ensure a **SAFE, EFFICIENT and ASSERTIVE** operation.*

OUR SERVICES

OUR SERVICES

The training we offer is initial and recurrent for the different flight equipments.

Initial training (L I, II & III).

Any one given a single time and serves to help the participant know the general, operational and functional features of the aircraft systems. As well as the identification of the main components and the corresponding technical documentation.

Recurrent training (L IV & V).

All that is given periodically and serves for the participant to remember and/or review certain activities and operational and functional information of specific aircraft systems. Fault isolation, operation of test equipment, etc.

OUR SERVICES

We also offer additional courses on specific operations and knowledge on aspects of human performance.

Special operations.

All those operations that are presented to improve the operation of aircraft, for example, airspace optimization, operations under minimums, etc. Some of these courses are **RVSM, ETOPS, PBN, CAT II/III, Cold weather operations, high altitude operations,** etc.

Complementary courses.

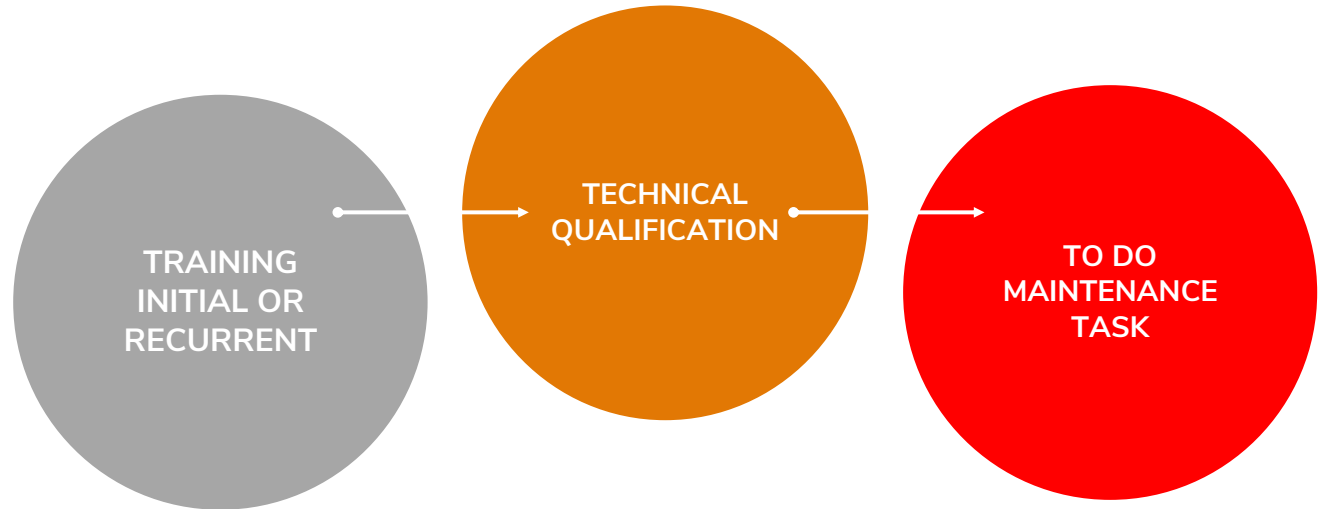

They are courses that encourage continuous improvement in human performance and its interaction with the environment, such courses give us tools to develop activities safely. For example; **MRM, aviation safety, dangerous goods, first aid,** etc.

OUR SERVICES

STUDENT QUALIFICATION PROCESS

The process for a person to obtain the necessary technical level consists of 3 phases:
